

As we continue the development of the Pineywoods CCS Hub in Southeast Texas, we aim to work with local leaders and residents to develop a safe and environmentally responsible project that benefits the communities in and around our project.

To support this effort, we have hired Dale Nadeau as a Local Representative for the Pineywoods CCS Hub. Dale is available to help facilitate communication between the project and the community.

With an impressive background spanning over 25 years in the oil and gas industry, including acting as an Oil and Gas Landman for Crew Land Research over the last 8 years, Dale brings a wealth of experience and expertise to the Pineywoods team. Outside of work, Dale enjoys indulging in his hobbies, which include a passion for cars, exploring new destinations through travel, and maintaining a healthy lifestyle through fitness activities.

Visit our website for more information and resources on the Pineywoods CCS Hub or connect with Dale at the contact information below. Also, look for an announcement of our local office where you can soon get face time with Dale for all your project needs.
