

The Tenaska team is making steady progress on the development of the Pineywoods CCS Hub and has many exciting updates to share with you.

Our sequestration site now encompasses more than 20,000 acres of underground pore space in Liberty, Hardin and Jefferson counties, under agreements with more than 25 landowners who are already seeing the financial benefits of the Pineywoods CCS Hub. Landowner participation is important to the overall success of the project, and we appreciate your support!

We continue to have positive dialogue from a large number of manufacturers and industrial facilities about their need for the Pineywoods CCS Hub, comparing operational timelines and firming up these customer agreements.

As we previously shared, the project filed its Class VI application with the U.S. Environmental Protection Agency and the Texas Railroad Commission last fall. Our team is having a productive dialogue with those agencies as the application is under review. This is a lengthy process that is expected to take two years to complete.

Meanwhile, our team is increasing its focus on the pipeline route that will connect the sequestration site with manufacturing and industrial customers in both Houston and Beaumont/Port Arthur. Initial surveying of the pipeline route is underway, and we have filed the application for our T-4 pipeline permit with the Texas Railroad Commission to obtain common carrier status. You can learn more about the safety of carbon capture and storage (CCS) projects, including pipelines, here: <https://pineywoodscshub.com/safety/>.

Lastly, we established our project office in Liberty earlier this spring, and we now have regular office hours. You can visit with me 1-3 p.m. Tuesdays and 10 a.m.-noon Thursdays or by appointment.

Pineywoods CCS Hub Office
1919 Trinity St., Ste B
Liberty TX 77575

Please don't hesitate to reach out to me with questions or suggestions. You can also keep up to date on the project by visiting our website: [Pineywoods CSS Hub \(pineywoodscshub.com\)](https://pineywoodscshub.com)
